Re: Hexcel Corporation, Permit Log # 01-90-3837

Dear Mr. Ritchey,

This is in response to your letter dated February 4, 1991 to me which questioned permit condition 2, and control requirements 3 and 5 for the above referenced permit and certificate.

The Department has completed reviewing your request to reexamine the above referenced permit conditions. Based on the reasons addressed in your letter and a review of the permit and department policy, the requests have been addressed as follows:

In accordance with Department policy we will require Hexcel to install a flow meter and continuous recorder per condition 2.

Installation of a continuous hydrocarbon monitor and recorder must be followed per control requirements 3 and 5 with the following provision. Hexcel may operate for the initial period of 180 days without the required continuous hydrocarbon monitor and recorder provided that Hexcel receives written approval of a temporary monitoring procedure from:
